REVIEW 1

I.   Acknowledgement

It is often said that "Gratitude is the sign of noble souls". That's why we devote this chapter to express our deep gratitude towards those who have supported and guided us to accomplish this eProject successfully.

First and foremost, we appreciate the invaluable assistance that our beloved instructor - Mrs. Le Mong Thuy, has offered us. Whenever problems come up, she'll always the one that we can count on for solutions. Moreover, there were moments when our team decided to give up our project, and Mrs. Thuy gave us a pep talk to keep us back on the track.

Next, it would have been impossible to carry out and complete this project without the collaboration among our team members. Although we have gone through many obstacles during the project implementation, eventually we gained what we aimed at by our hard work, our strong commitment and of course, our brotherhood.

Finally, thanks to Aptech's eProject assignment, we had a golden opportunity to apply what we have learnt into reality and gain hands-on experience which is essential for our future career.

.

II.   Problem Definition:

1. Introduction

GUNDAM-X is a specialized online store for Gundam model kits, catering to enthusiasts and collectors of Gundam models.

We provide users with a "diverse collection" of Gundam models from popular film, anime, and manga series. Users can find models of their favorite characters with intricate details, as well as exclusive and limited-edition Gundam models.

Our website serves as a platform for users to connect with a community of Gundam model enthusiasts. Users can engage in forums, discussion groups, and share their experiences, tips, and techniques in building and customizing their models.

Additionally, we offer users a dedicated section for News and updates on upcoming model releases, keeping them informed about the latest developments in the Gundam model world.

2. Existing Scenario

Beyond being a mere store, our website also functions as a vibrant community hub for Gundam model enthusiasts. Users can engage in forums and discussion groups, where they can connect with like-minded individuals who share their passion for Gundam models. It provides a platform for users to interact, share their experiences, and exchange tips and techniques for building and customizing their models. Whether customers are seeking advice on painting techniques, decal application, or advanced model modifications, our community is there to support and inspire them.

In addition to our extensive collection and community features, we also offer a dedicated section for News and updates. This section keeps customers informed about the latest developments in the Gundam model world, including upcoming model releases, special promotions, and events. By regularly updating this section, we ensure that our customers stay ahead of the curve and have access to the most recent information in the Gundam model industry.

At GUNDAM-X, we are committed to providing Gundam enthusiasts and collectors with an exceptional online shopping experience. We strive to offer a comprehensive selection of high-quality Gundam model kits, foster a vibrant community, and keep our customers informed about the latest trends and releases. Whether customers are new to Gundam models or seasoned collectors, they can rely on GUNDAM-X to meet their needs and fuel their passion for the Gundam universe.

III.   Requirement Specification

1. Customer's Requirement Specifications

✓ The site allows customer to choose the Gundam model they want to buy.

1. **Functional Requirement Specifications**
   1.1. Function of User: User can:
   - ✓ REQ-01. Register.
   - ✓ REQ-02. Login, logout.
   - ✓ REQ-03. Add cart.
   - ✓ REQ-04. Search products.
   - ✓ REQ-05. View News Gundam.
   - ✓ REQ-06. View bought history.
   - ✓ REQ-07. Update personal information.
   - ✓ REQ-08. Send feedback.

   1.2. Function of Admin: Admin can:
   - ✓ REQ-09. Login, logout.
   - ✓ REQ-10. Change password
   - ✓ REQ-11. Manage category.
   - ✓ REQ-12. Manage products.
   - ✓ REQ-13. Manage users.
   - ✓ REQ-14. Manage feedback.
   - ✓ REQ-15. Manage transaction.
   - ✓ REQ-16. View revenue report.

Note: Constraint validation must be provided wherever necessary. And the website should have the smooth navigations.

2. System Requirement Specifications

2.1. Server requirements:
- ✓ Hardware:

Component	Requirement	
CPU	Processor type: Pentium IV-compatible processor or faster Processor speed: Recommended: 2.0 GHz or faster	
OS	Microsoft Windows 10 or higher with IIS	
Memory (RAM)	RAM: Minimum: 512 MB Recommended: 2 GB or more	
Hard Drive	Free space: Minimum: 200 MB Recommended: 50 GB or more Maximum: Operating system maximum	

✓ Software:

Component	Requirement
Microsoft .NET Framework	Version 4.5.1
RDBMS	MySQL

2.2. Client requirements:

✓ Hardware:

Component	Requirement
CPU	Processor type: Pentium III-compatible processor or faster Processor speed: Recommended: 1.0 GHz or faster
OS	All OS(Window ,Linux ,Android ,Mac OS …)
Memory (RAM)	RAM: Minimum: 512 MB Recommended: 1 GB or more Maximum: Operating system maximum
Hard Drive	Free space: Minimum: 10 MB

✓ Software:

Component	Requirement
Web Browser	IE 4.0 , Firefox 3.0,Chrome or Higher…..

3. Development Software:

✓ Microsoft Visual Studio Code.
✓ XAMPP Control Panel v3.3.0.

REVIEW 2

USE CASE

1. VISITOR

VISITOR

LOGIN AS VISITOR:

Author	
Use Case Name	Login
Actors	Customer
Description	Customer who has registered an account can login
Requirements	Customer provides username and password
Pre-conditions	Visitor must register an account
Post-conditions	Success: Visitor is logged in to website
	Fail: Refill information
Basic flow	**Actor's actions:**	**System's responses:**
	1. Visitor clicks 'Login' button on Home Page.	2. System redirects to Login Page with the following controls: - "Email" text field - "Password" text field - "Login" button
	3. Actor inputs Email and Password, then click the 'Login' button.	4. System checks the information. 5. System redirects to Customer's dashboard.

	Actor's actions:	System's responses:
Exceptions		
	1. Actor inputs invalid email and password.	System redirects to Login page with the following controls: - "Email" text field - "Password" text field - "Login" button System shows message: "Invalid email and password".

REGISTER AS VISITOR:

Author	
Use Case Name	Register as Visitor
Actors	Customer
Description	Customer who has registered an account can login
Requirements	Customer registers an account on the website and becomes a member
Pre-conditions	Customer provides their register information
Post-conditions	Success: Visitor creates a User account in this website
	Fail: Refill information

Basic flow	**Actor's actions:**	**System's responses:**
	1. Visitor clicks "Register" button on Home Page.	2. System redirects to Register page and displays Registration form with the following controls: - "Username" text field - "Password" text field - "Confirm Password" text field - "Email" text field

		- "Phone" text field
		- "Register" button
		- "Reset" button
		4. System validates the information.
	3. Visitor inputs register's information and click "Register" button.	5. System inserts the account into database
		6. System show success message.
Exceptions	**Actor's actions:**	**System's responses:**
	- Actor left "Username" text field blank.	System displays message to customer:
	- Username has already existed.	- "Username cannot be blank".
	- Actor left "Password" text field blank.	- "This Username has already existed".
	- Actor left "Confirm Password" text field blank.	- "Password cannot be blank".
	- Password and confirm password don't match.	- "Confirm Password cannot be blank".
	- Actor left "Email" text field blank.	
	- Email has already existed.	- "Confirm Password does not match password.".
	- Actor left "Phone" text field blank.	- "Email cannot be blank".
	- Input phone is not numeric format or phone length is not between 8 and 14 characters.	- "This Email has already existed".
		- "Phone cannot be blank".
	- Actor left "Email" text field blank or input an invalid email address.	- "The phone number should be numeric only and must be between 8 and 14 digits".
		- "Email is invalid".

SEARCH PRODUCTS:

Author	
Use case name	Search product
Actors	Registered Customer/ New Customer
Description	Customer can search product
Requirements	Customer provides search phrase
Pre-conditions	N/A
Post-conditions	Success: Show product that matches search phrase
	Fail: No product is shown

Basic flow	**Actor's actions:**	**System's responses:**
	1. Actor inputs search phrase. 3. Actor clicks product's name in list or view every product that matches search phrase.	2. System shows list of products that match the search phrase.

VIEW PRODUCT DETAIL:

Author	
Use case name	View product
Actors	Registered Customer/ New Customer
Description	Customer can view product detail

Requirements	Customer select product to show product's detail	
Pre-conditions	N/A	
Post-conditions	Success: Display product detail matching the selected product	
	Fail: No product is shown	
Basic flow	**Actor's actions:**	**System's responses:**
	1. Actor select product	2. System shows product's detail matching selected product

CREATE CART:

Author		
Use case name	Create cart	
Actors	Registered customer	
Description	Customer can add product to their cart	
Requirements	Customer must choose at least one product	
Pre-conditions	Customer must log in before adding product	
Post-conditions	Success: Actor add product to cart successfully	
	Fail: Refill information	
Basic flow	**Actor's actions:**	**System's responses:**
	1. Actor chooses a product and click "Add to cart".	2. System adds selected product to cart by id of this product.

Exceptions	Actor's action	System's response
	1. Actor inputs more products than there are in stock.	2. System shows messages: - "Product out of stock".

VIEW CART:

Author	
Use case name	View cart
Actors	Registered customer
Description	Customer can view their cart
Requirements	N/A
Pre-conditions	Customer must log in before view cart
Post-conditions	Success: Customer can view their cart
	Fail: Refill information

Basic flow	Actor's actions:	System's responses:
	1. Actor click on "Cart" icon.	2. System shows cart and added products.
Alternative flow	1. Actor clicks "x"– Close button- on table	2. System redirects to current page.
	3. Actor change quantity of a product	4. System update quantity of this product into cart.
	5. Actor clicks "x" – close button – in the right side of each product.	6. System removes this product from cart.

CHECKOUT:

Author	
Use case name	Check out and Place order
Actors	Registered customer
Description	Customer can order products
Requirements	Customer must has at least 1 product in cart
Pre-conditions	Customer must log in before adding product
Post-conditions	Success: Actor order successfully
	Fail: Refill information
Basic flow	**Actor's actions:**	**System's responses:**
	1. Actor click "Add to cart" button or "Cart" icon.	2. System shows cart and added products.
	3. Actor clicks "Check out with" button.	4. System shows all products in cart with calculated total price and show following controls:
	5. Actor inputs order information then click "Place Order" button.	- "Customer name" text field.

		- "Address" text field.
	9. Actor views order's status in Order page.	- "Province" select box.
		- "Delivery time frame" select box.
		- "Payment" table.
		Systems shows Payment tab type according to type of payment actors choose.

		7. System validates information.
		8. System redirects to Order page and show order's status.
Alternative flow	1. Actor clicks "x"– Close button- on table	2. System redirects to cart page.
	3. Actor clicks "X" button on each product.	4. System removes product from cart.
	5. Actors clicks "Home" button.	6. System redirect to Home pages.
Exceptions	**Actor's action**	**System's response**
	1. Actor inputs more products than there are in stock.	8. System shows messages:
		- "Product out of stock".
	2. Actor left "Billing name" text field blank.	- "Order name must not be blank".
	3. Actor left "Address" text field blank.	"Address must not be blank".
	4. Actor left "Delivery date" blank.	"Must choose a delivery date".
	5. Actor left "Delivery time frame" blank.	"Must choose a delivery time frame".
	6. Actor left "Payment" dropdown blank.	"Must choose a payment method".
		"Invalid card".
	7. Actor inputs invalid card information.	

VIEW ORDER HISTORY:

Author	
Use case name	View order history
Actors	Registered customer

Description	Customer can view their order history	
Requirements	N/A	
Pre-conditions	Customer must log in to website	
Post-conditions	Success: Customer can view their order.	
	Fail: Customer cannot see their order.	
Basic flow	**Actor's actions:**	**System's responses:**
	1. Actor chooses "Account" icon on Menu 3. Actor chooses "Purchase history" on sides bar. 5. Actor selects the order that they want to view in "Purchase history" and clicks "View" Button.	2. System redirects to Account page. 4. System redirects to "Purchase history" page and displays a list of existing orders and their status. 6. System validates inputs by id of Order. 7. System displays all order's detail and its status.

CANCEL ORDER:

Author	
Use case name	Cancel order
Actors	Registered customer
Description	Customer can cancel their order
Requirements	Customer provides order's id to cancel
Pre-conditions	Customer must log in to website and only can cancel when this order has not been confirmed by admin

Post-conditions	Success: Cancel successfully.	
	Fail: Order cannot cancel.	
Basic flow	Actor's actions:	System's responses:
	1. Actor chooses "Account" icon on Menu	2. System redirects to Account page.
	3. Actor chooses "Purchase history" on sides bar.	4. System redirects to "Purchase history" page and displays a list of existing orders.
	5. Actor selects the order that they want to cancel in "Purchase history" and clicks "Cancel" Button.	6. System validates inputs by id of order.
		7. System change order status in database.
		8. System displays message: successful for error.

2. ADMIN
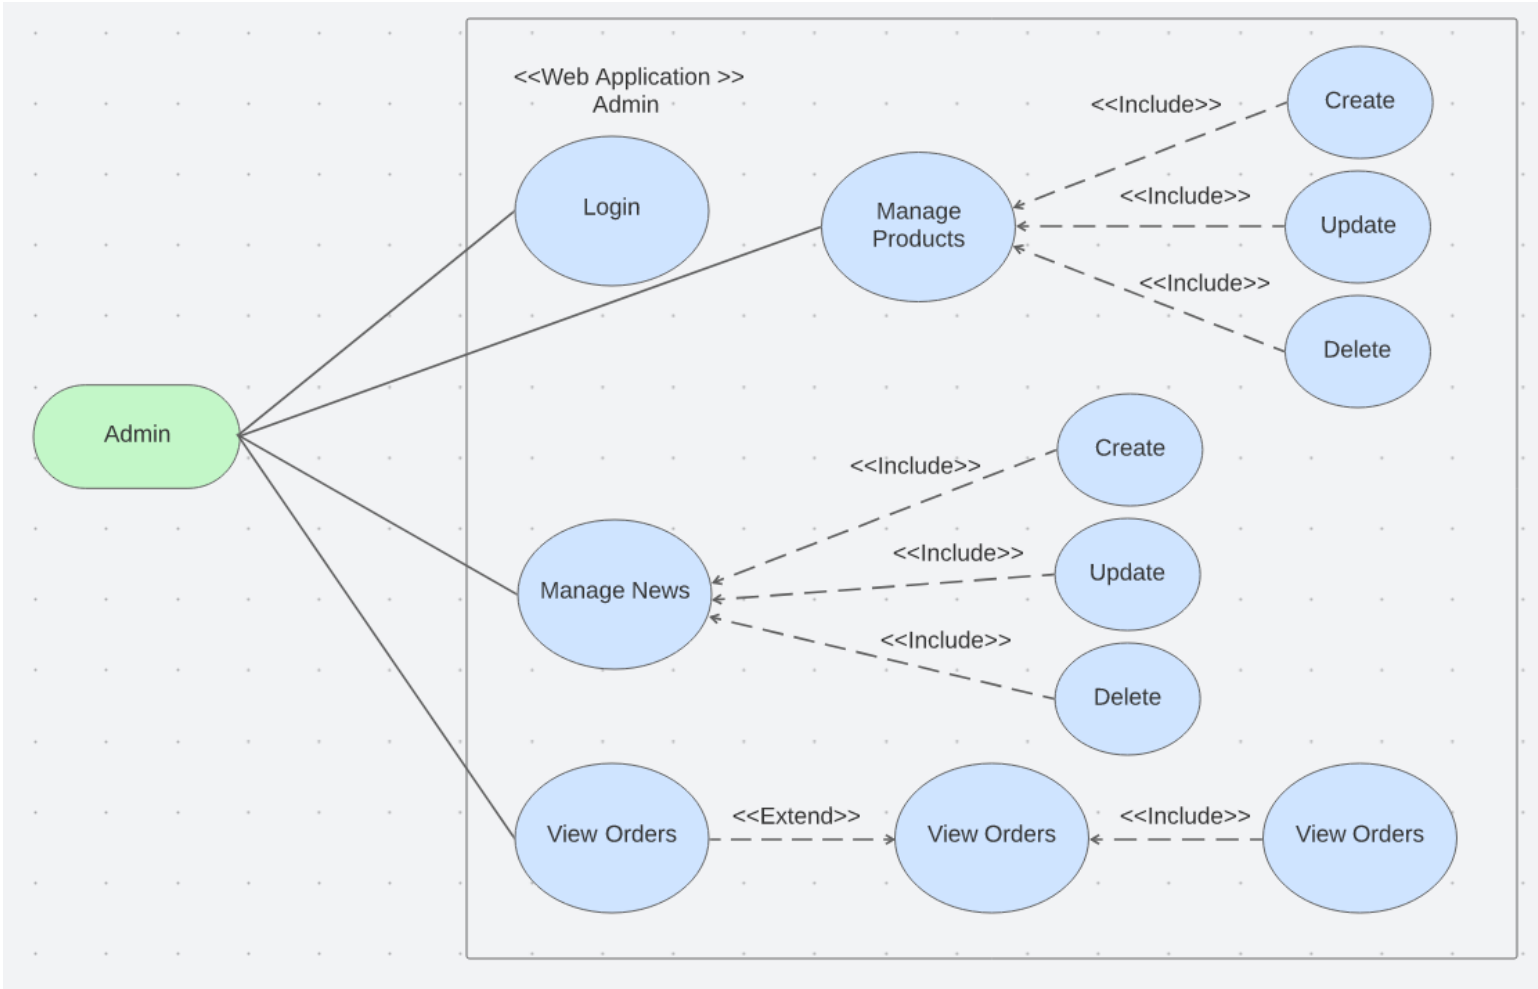

LOGIN

Author	
Use case name	Login
Actor	Admin

Description	When admin wants to manage products, news, views orders and orders detail
Requirements	Admin provides username and password
Pre-conditions	Admin must be exist on database
Post-conditions	Success: Admin is logged in to website admin
	Fail: refill information

	Actor's actions:	System's responses:
Basic flow	1. Actor clicks on 'Login' button. 3. Actor inputs Email and Password, then click the 'Login' button.	2. System redirects to Login Page with the following controls: - 'Email' text field - 'Password' text field - 'Login' button 4. System validates the information. 5. System redirects to Admin website
Exceptions	Actor's actions:	System's responses:
	1. Actor inputs invalid email and password	System redirects to Login page with the following controls: - 'Email' text field - 'Password' text field - 'Login' button.

PRODUCTS

Create new Product

Author	
Use case name	Create new product
Actor	Admin
Description	When admin wants to create a new product
Requirements	Actor provides product's information
Pre-conditions	Actor is logged in admin
Post-conditions	Success: new product is added into the database
	Fail: refill information

	Actor's actions:	**System's responses:**
Basic flow	1. Actor chooses Product Tab on menu. 3. Actor clicks 'Add New Product' button. 5. Actor inputs information to create new product	2. System redirects to 'Product' page and display a list of existing product. 4. System displays a form with the following fields: - id - category_id - sale_id - name - name_slug - description - price

		- view_count
		- quantity
		- active
		- detail
		- image
		6. System validates inputs.
		7. System adds product into database.
		8. System displays confirmation message or error message.

Update Product

Author	
Use case name	Update product's detail
Actor	Admin
Description	When admin wants to update product
Requirements	Admin provides product's information
Pre-conditions	Actor is logged in admin
Post-conditions	Success: product is updated in the database
	Fail: refill information
	Actor's actions:	**System's responses:**
	1. Actor chooses Product Tab on menu.	2. System redirects to 'Product Details' page and display a list of existing

Basic flow	3. Actor clicks on 'View Details' on a product. 5. Actor chooses the criteria they want to update and input information.	product. 4. System displays a form with the following fields. - category_id - sale_id - name - name_slug - description - price - view_count - quantity - active - detail - image 6. System validates inputs. 7. System update product into database. 8. System displays confirmation message or error message. 9. System redirects to product's detail page.

Delete Product

Author	
Use case name	Delete Product

Actor	Admin
Description	When admin wants to delete product from the database
Requirements	Admin provides product's information
Pre-conditions	Actor is logged in admin
Post-conditions	Success: product is delete in the database
	Fail: product is not delete from the database

	Actor's actions:	System's responses:
Basic flow	1. Actor chooses Product Tab on menu. 3. Actor clicks 'Delete' button.	2. System redirects to 'Product List' page and display a list of existing product. 4. System delete product in the database 5. System displays confirmation or error.

MANAGE

CREATE NEW MANAGE

Author	
Use case name	Create News
Actor	Admin
Description	When admin wants to create a News

Requirements	Admin provides New content
Pre-conditions	Actor is logged in admin
Post-conditions	Success: News content is added into the website
	Fail: admin can't create News

	Actor's actions:	System's responses:
Basic flow	1. Actor chooses News Tab on menu. 3. Actor clicks 'Add New Content' button. 5. Actor inputs information to create news	2. System redirects to 'News' page and display a list of News. 4. System displays a form with the following fields: - id - name - content - image 6. System validates inputs. 7. System adds News into website. 8. System displays confirmation message or error message.

UPDATE MANAGE

Author	
Use case name	Update News on the website
Actor	Admin

Description	When admin wants to update news information
Requirements	Admin provides News Content
Pre-conditions	Actor is logged in admin
Post-conditions	Success: News is updated in the website
	Fail: admin can't update News
Basic flow	**Actor's actions:**	**System's responses:**

Basic flow	1. Actor chooses View Order on menu. 3. Actor clicks 'Detail' button.	2. System redirects to 'Order List' page and display a list of Order. 4. System show Order Details in the website 5. System displays confirmation or error.

UPDATE ORDER STATUS

Author	
Use case name	Update Order Status
Actor	Admin
Description	When admin wants to update Order Status from the website
Requirements	Admin has at least 1 order on website.
Pre-conditions	Actor is logged in admin
Post-conditions	Success: Admin can update Order Status on the website
	Fail: Admin can't update Order Status on the website
Basic flow	**Actor's actions:**	**System's responses:**
	1. Actor chooses View Order Tab on menu. 3. Actor clicks 'Delete' button.	2. System redirects to 'Order List' page and display a list of Order. 4. System update Order Status in the website 5. System displays confirmation or

3. WEBSITE ADMINISTRATOR
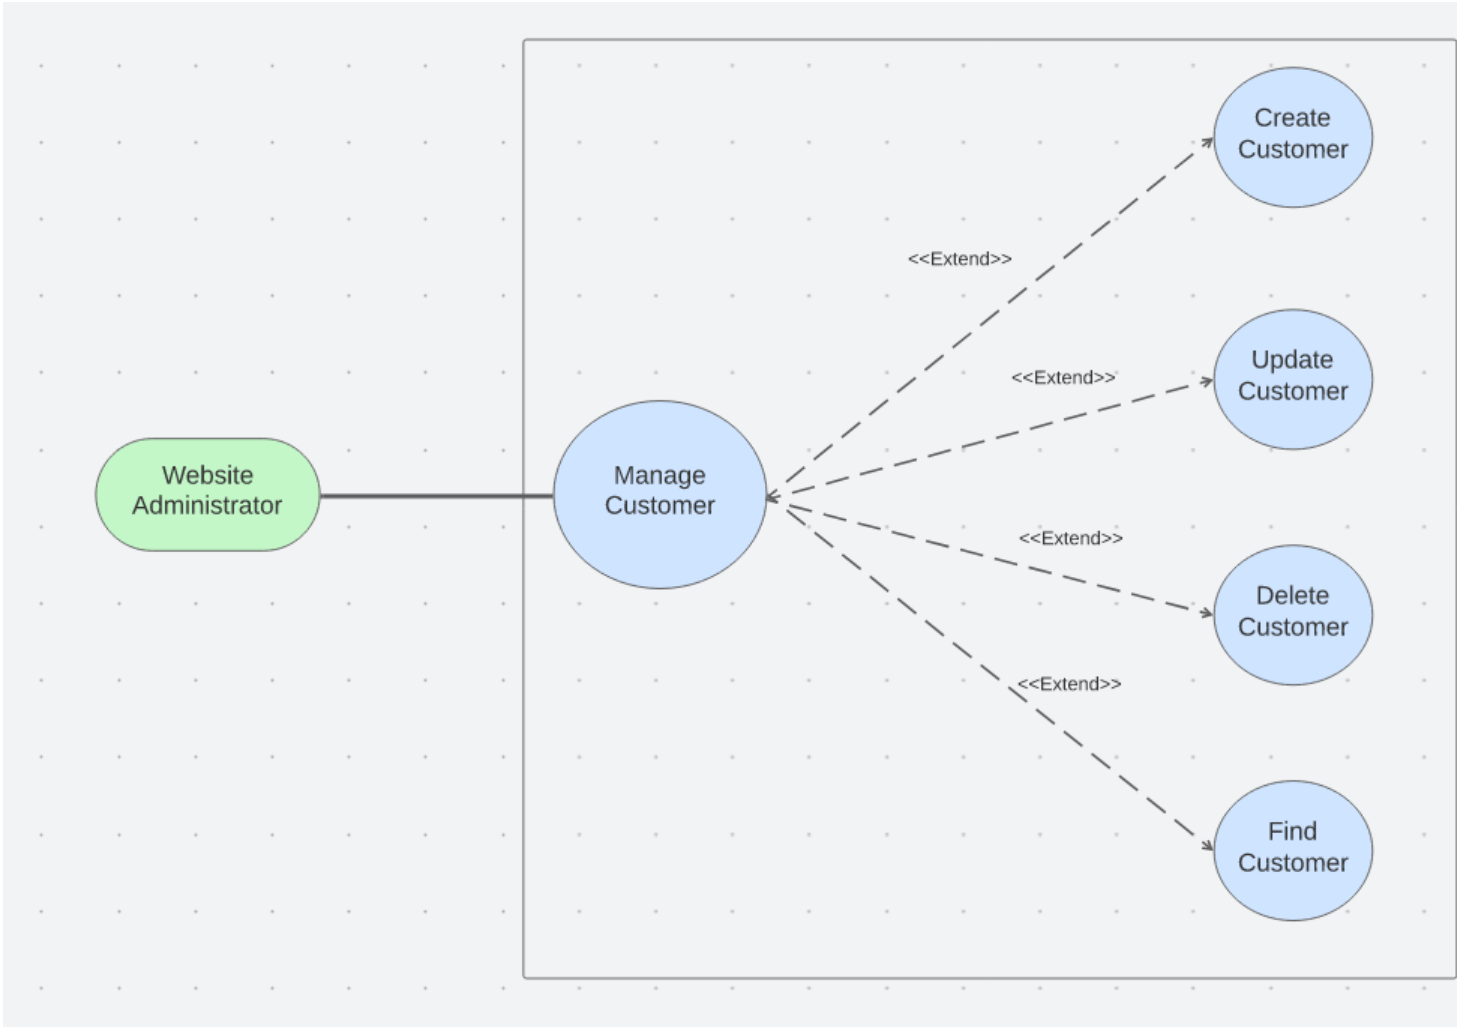

CREATE CUSTOMER

Author	
Use case name	Create Customer
Actor	Admin
Description	When admin wants to create customer
Requirements	Actor provides customer information

Pre-conditions	Actor is logged in admin	
Post-conditions	Success: new Customer is added into the database	
	Fail: refill information	
	Actor's action	**System's responses:**
Basic flow	1. Actor chooses Customer Tab on menu. 3. Actor clicks 'Add New Customer' button. 5. Actor inputs information to create Customer.	2. System redirects to 'Customer' page and display a list of existing Customers. 4. System displays a form with the following fields: - id - fullname - username - password - address - phone - email - birthday

		- gender
		- active
		6. System validates inputs.
		7. System adds new customer into database.
		8. System displays confirmation message or error message.

UPDATE CUSTOMER

Author	
Use Case Name	Update Customer
Actors	Admin
Description	When admin wants to Update customer
Requirements	Actor provides customer information
Pre-conditions	Actor is logged in admin
Post-condition	Success: Customer is update into the database
	Fail: refill information

Basic flow	Actor's action	System's responses:
	1. Actor chooses Customer Tab on menu.	2. System redirects to 'Customer' page and display a list of existing Customers.
	3. Actor clicks on 'View Details' on a Customer	4. System displays a form with the following fields:
	5. Actor chooses the criteria they want to update and input information.	- fullname
		- username

		- password
		- address
		- phone
		- email
		- birthday
		- gender
		- active
		6. System validates inputs.
		7. System update customer into database.
		8. System displays confirmation message or error message.
		9. System redirects to customer's detail page.

DELETE CUSTOMER

Author	
Use Case Name	Delete Customer
Actors	Admin
Description	When admin wants to delete customer
Requirements	Actor provides customer information
Pre-conditions	Actor is logged in admin
Post-condition	Success: Customer is delete from the database

Basic flow	Actor's action	System's responses:
	Fail: Customer is not deleted from the database	
	1. Actor chooses Customer Tab on menu.	2. System redirects to 'Customer' page and display a list of existing Customers.
	3. Actor clicks 'Delete' button.	4. System delete customer in the database.
		5. System displays confirmation message or error message.
